E F & I Services Corp. is an independent, privately held provider of outsourced Communication Network Integration and Consulting Services with a 25 year history of providing superior service to the Nation's Carriers, Private Network Operators and Government agencies.

The company provides Consulting, Engineering, Deployment, Integration and Maintenance Solutions for *legacy* and *next generation networks*. Our expertise spans technology from twisted pair, broadband and optical fiber systems to Microwave, Cellular, WiFi and WiMAX systems and Multimedia IP networks. Our goal is to provide best in-class Telemedia and Mobilemedia solutions.

Our Advantage:

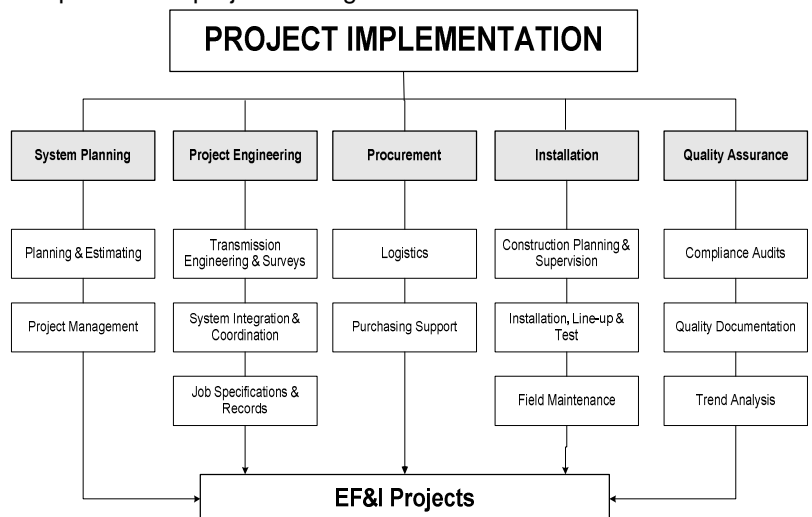

For 25 years, the nation's leading Wireline, Wireless and Broadband network operators, have trusted E F & I's experienced and quality certified professionals with the responsibility to plan, engineer, deploy and maintain their critical network infrastructure.

We are experts in:

- Auditing, Consulting and Outsource Solutions
- Multiple Industry Quality Standards
- Multi-vendor sourcing and integration
- Project costing
- Sub-contractor and Vendor management
- Total Project Management

Our variable cost approach to delivering technical expertise allows network operators access to deep technical talent without the burden of a long term financial commitment.

E F&I Services Corp. follows a field proven approach to comprehensive project management:
